“This is a wonderfully clear and engaging book on a very important and topical issue: How can science contribute to solving the problems society faces today? The cases are well chosen and the philosophical chapters do a great job in synthesizing many insights from recent philosophy of science into a coherent whole. The book succeeds admirably in showing the societal relevance of philosophical reflection on science.”

Henk de Regt, Professor of Philosophy of Science, Vrije Universiteit Amsterdam

Kostas Kampourakis is the author and editor of several books about evolution, genetics, philosophy, and history of science. He is currently a researcher at the University of Geneva, where he also teaches at the Section of Biology and the University Institute for Teacher Education.

Kevin McCain is an Associate Professor of Philosophy at the University of Alabama at Birmingham. He is a series editor for *Routledge Studies in Epistemology* and the author of numerous works in epistemology and philosophy of science.
