UNDERSTANDING
EVOLUTION

KOSTAS KAMPOURAKIS

What is evolution and why do so many people find it difficult to understand?

Understanding Evolution is a concise and accessible introduction to the core concepts of evolutionary theory, presented in the light of common conceptual obstacles. It shows that there is more than religious resistance to accepting evolution.

The Cambridge *Understanding Life* series is for anyone wanting an engaging and concise introduction to a current biological topic. Offering multi-disciplinary perspectives, these accessible guides address stereotypes and common misunderstandings in a thoughtful way, with the aim of facilitating a more in-depth understanding. Written by leading thinkers in each field, these books are for anyone wanting an expert overview that will enable clearer understanding on each topic.

About the series editor:

KOSTAS KAMPOURAKIS is the author and editor of books about evolution, genetics, philosophy, and history of science, and the editor of the Cambridge book series *Understanding Life*. He is a former Editor-in-Chief of the journal *Science and Education*, and two other science education book series. He is currently a researcher at the University of Geneva, where he also teaches at the Section of Biology and the University Institute for Teacher Education.

For more information on the series or if you would like to submit a proposal please do not hesitate to get in touch via **kampourakisCUP@gmail.com.**
